Autogas Dispensers

The Next Generation in LPG Refueling Dispensers

Parafour's P4-Series dispensers offer the next generation in advanced LPG refueling dispensing systems. From electronic upgrades to existing cabinet style mechanical dispensers, to dual purpose cylinder and Autogas refueling dispensers, through full retail "Pay at the Pump" Autogas unattended dispensers with fuel management systems, The P4-Series offer the best technology at the best price. You won't find a more feature rich and capable dispenser at a better price.

Highest Standards

Built to exacting standards and designed around ALL applicable codes and regulations (NFPA 58, NEC, UL-495 & NCWM Handbook 44), ONLY Parafour offers the most capable and compliant dispensers on the market today.

Attractive, Compact, Robust and Reliable

The P4-Series have no rivals. Designed and built by the most accomplished and experienced LPG dispenser design team in North America, you simply will not find a better product, better support, or better price!

Dedicated to Quality, Technology & Affordability

Parafour Innovations is dedicated to quality, technology & affordability, with a focus on technology, support, and future expandability to meet the needs of a rapidly evolving and growing LPG refueling market. Invest today in a product which will give you years of faithful service and upgradeable enhancements to improve your efficiency and customer service as your business grows!

Continuous Support

You can count on our team to help you every step of the way: from designing dispensing systems, to installation, to service after the sale.

"Gas Equipment Company has been supporting us with our Autogas installations for many years. They have been with us for the entire process, answering all our questions, designing the systems based on our customers' needs and providing support before, during and after installation. We look forward to many more installations."

**- Alan E. Moore
President - Moore Propane LLC**

"The new Parafour Dispensers that we purchased over the last two years and have installed at both of our Bus Terminals has made the fueling process literally flawless, and we are glad to continue using your company for all our propane fueling system needs."

**- Billy Jackson
Vehicle Maintenance Supervisor - Leander I.S.D.**

Standard Features

- Automatic temperature compensation
- Advanced electronic “touch” calibration
- Enhanced accuracy with quadrature pulser
- 5-level preset pricing
- Leak/theft detection
- Integrated fuel management system interface
- Liqua-Tech LPM102 or Neptune 4D-MD meters
- Optional mass flow meters
- ETL listed to UL-495 NTEP certified for retail sale

Computer Features

- Single large display with total sale, price per gallon and gallons
- Easy to read back-lit LCD displays
- Intuitive programming with secure keypad
- 16 Key alpha-numeric keypad
- 5-level secured access programming
- 110 vac/60Hz OR 220vac/50 Hz power supply
- Communicates to most fuel management systems
- Integral Gilbarco 2-wire communication protocol

Para FUEL

ParaFUEL is a comprehensive fuel management system, which can be used as either a private fleet fuel management system, or as a general retail fuel sales management and control system. The RFID reader can be installed inside the head of most Parafour P4 dispensers; not requiring a separate standalone card reader. The ParaFUEL POS Console package includes a console computer, monitor, keyboard, mouse, card/FOB encoder/reader, internal communications module, and

ParaFUEL software. The system DOES require a data cable connection between each dispenser and the Site Controller, installed in the facility building.

The ParaFUEL system consists of 2 main subsystems: the user interface system and site controller. The system is activated by an RFID device, registered to the ParaFUEL database, by simply waving in front of the RFID icon on the main display.

Para FLEET

Low cost basic fleet management for small fleets where basic information is required, or where it is impractical to run fixed communication line.

- Close proximity RFID communication for security with FOB or Card
- USB thumb drive data retrieval or ethernet network access
- Database file can be saved as common file formats, .xls or .csv
- Networkable ability with Ethernet port
- Built into the dispenser, no additional installation cost
- Optional easy to Install pedestal mount for existing dispensers
- Pedestal mount for up to 4 hoses per unit
- Comes standard with 12” power and comm cables, conduit and seal
- NEMA 4X enclosure with attractive sun and weather shield
- Easy to install with all Parafour P4 Series dispensers, or other with Gilbarco 2 wire protocol, including Gasboy gasoline, diesel, etc

Prices subject to change without further notice. F195 02/2022
